

es-Comm™ Communication Earpiece

estron

Unparalleled Ergonomics and Discreet Design

Introducing es-Comm™, a groundbreaking addition to our product solutions. This revolutionary communication earpiece sets a new benchmark in comfort, discreetness, and sound quality. By integrating our expertise in hearing and audio, our solutions redefine communication for security professionals, bodyguards, and police.

- Unmatched ODM Partnership
- Ultra-thin fibre-reinforced cable from Ø0.9mm/0.035"
- Ultimate wear and ear comfort for prolonged use
- Discreet almost invisible for covert operations
- Mission-critical audio quality and reliability
- Superior to acoustic tubes in comfort and sound
- Skin-friendly es-Linum® cables (medical-grade option)
- Ultra-soft, ruggedized, and shielded cable options
- Open fit eartip for situational awareness
- IP67 protection to withstand real-life use
- TAA - Trade Agreement Act - compliant

Next Level Performance - Elevating Communication Solutions

For three decades, estron has brought connections to life worldwide, providing the smallest and most durable solutions to hearing aids. A track record of millions of cable-based receiver-in-the-canal (RIC) connectors based on insert moulded es-Linum® cables, different plugs, materials, and shapes serves as proof of our concept. Engineered with a medical-grade cable and offering customisable options, es-Comm™ ensures mission-critical performance in various demanding scenarios.
